

David Laughlin—Bridgland High School, Cypress Texas

I like being able to move these work tables around for students to assemble, glue and work on. They are very sturdy and have locking castors. It's always valuable for students to have and use organized tools so they can get the job done but of course it takes work to keep it organized. The bins have a variety of sizes of nuts, bolts, washers, and also takes some work to keep them organized.
